

The Montreal Hilton  
CGC Group  
InnKeeper &  
SpaceKeeper

Montreal, QC

## The Project

The Montreal Hilton Garden Inn is a mixed use property which includes a full service hotel, restaurants and luxury condominium suites. The varying needs of the property required a system with the flexibility to service multiple spaces of varying sizes and demands, all with the same efficiency and reliability.

## The Solution

Keeper and SpaceKeeper units proved to be the perfect choice in meeting the diverse needs of this project. The mixed use facility utilized the flexibility of CGC's **FREEHEAT™** technology. The unique Heat Recovery system reduced boiler operation and increased cooling efficiency. The system produces heat without using the compressor, significantly reducing operating costs and providing a more quiet operation. The retrofit friendly nature of the products only left a small footprint in the rooms, a testament to the eco-friendly nature of the CGC Hybrid systems.
